05	Task 2 – Content Distribution Dashboard
06	Task 3 – Country-Wise Content Analysis
07	Task 4 – Release Trend Visualization
08	Key Findings, Conclusion and Deliverables

1. Executive Summary

This project presents an Excel-based analysis of a Netflix titles dataset. The objective was to prepare the data for analysis and convert selected information into clear tables, charts and dashboards. Four tasks were completed: data cleaning and chart preparation, content-type distribution, country-wise analysis, and release-year trend visualization.

The completed workbook brings the analysis together in one place. Task-wise screenshots are organized separately to make the work easier to review. The reported cleaned dataset contains 8,790 records. The content distribution dashboard shows 6,126 Movies and 2,664 TV Shows.

> **Project outcome:** A consolidated Excel workbook with four completed task areas and supporting screenshots.

2. Project Overview

Data visualization helps transform rows of data into information that can be understood and compared. In this project, Microsoft Excel was used to inspect the Netflix titles dataset, summarize selected fields, and present the results using Pivot Tables and charts.

2.1 Objectives

- Review and clean the dataset so it can be used consistently for analysis.
- Summarize the number and proportion of Movies and TV Shows.
- Compare title availability across countries through a ranking view and filter.
- Explore the distribution of titles by release year and identify notable patterns.
- Present results in dashboards that are easy to read and review.

2.2 Project Scope

The scope of this report is limited to the four completed Excel tasks. The analysis describes the fields and values represented in the project workbook; it does not attempt to make claims about Netflix's entire business performance, audience behavior, viewing hours, or current catalogue.

2.3 Dataset at a Glance

Item	Description
Dataset subject	Netflix titles
Main analysis fields used	Content type, country and release year
Working record count	8,790 cleaned records
Analysis environment	Microsoft Excel workbook

3. Tools, Excel Features and Methodology

3.1 Tool Used

Tool / Feature	Purpose in this project
Microsoft Excel	Data review, calculations, tables, charts and dashboards
Data cleaning	Prepare a consistent working dataset
Pivot Tables	Summarize records by content type, country and release year
Pie Chart	Show the proportion of Movies and TV Shows
Column Chart	Compare the title counts for the two content types
Bar Chart	Display the top countries by title count
Line Chart	Visualize title counts across release years
Slicer / Filter	Allow country-wise dashboard exploration

3.2 General Workflow

1. Open and review the supplied Netflix dataset in Excel.
2. Prepare the working data and check for data-quality issues.
3. Create Pivot Tables to aggregate the fields required for each task.
4. Build charts from the summarized data.
5. Arrange the charts and summary figures into task-specific dashboards.
6. Save the master workbook and capture task-wise screenshots.

3.3 Presentation Principles

- Use descriptive titles so each chart communicates its purpose.
- Keep the key totals and percentages visible near the relevant chart.
- Use consistent labels and number formats across dashboard elements.
- Keep the source workbook and screenshots organized by task.

4. Task 1 – Data Cleaning & Chart Preparation

4.1 Purpose

The first task focused on preparing the Netflix dataset for subsequent analysis. Data cleaning is an important step because inconsistent or repeated records can affect summaries and visualizations.

4.2 Work Completed

- Reviewed the original dataset and prepared a cleaned working dataset.
- Checked records for duplicate IDs.
- Reviewed a malformed row and repaired one row as recorded in the project work.
- Prepared a Pivot Table to summarize the cleaned data.
- Created basic charts to support an initial overview.

4.3 Recorded Data-Quality Summary

Check	Recorded result
Cleaned records	8,790
Duplicate IDs	0
Malformed rows repaired	1

4.4 Result

The task produced a cleaned working dataset and a basic analytical view that could be reused for the remaining dashboard tasks. The workbook contains the supporting data, Pivot Table and charts.

Evidence: Refer to the Task_1_Data_Cleaning screenshot folder and the master Excel workbook.

5. Task 2 – Netflix Content Distribution Dashboard

5.1 Purpose

This task examined how the Netflix titles in the working dataset are divided between Movies and TV Shows. The goal was to make the two categories easy to compare using summary figures and charts.

5.2 Dashboard Components

- Summary cards for total titles, Movies and TV Shows.
- Pie Chart titled “Netflix Content Share”.
- Column Chart titled “Titles by Content Type”.
- A key takeaway summarizing the relative share of each content type.

5.3 Results

Content type	Number of titles	Share
Movies	6,126	69.7%
TV Shows	2,664	30.3%
Total	8,790	100%

5.4 Key Observation

Movies account for the larger portion of the dataset at 69.7%, while TV Shows account for 30.3%. The Pie Chart communicates the proportion of each category, while the Column Chart makes the count difference easier to compare.

> **Evidence:** Refer to the Task_2_Content_Distribution screenshot folder and the Task 2 dashboard in the workbook.

6. Task 3 – Country-Wise Content Analysis Dashboard

6.1 Purpose

This task focused on comparing the number of Netflix titles associated with different countries. The dashboard was designed to provide a ranking view and allow the country data to be explored.

6.2 Dashboard Components

- A country-wise ranking table.
- A horizontal bar chart titled “Top 10 Countries by Netflix Titles”.
- A Country Filter slicer for interactive selection.
- A country-wise analysis table with Country, All Titles, Movies and TV Shows.
- A Geographical Insights section.

6.3 How to Read the Dashboard

The horizontal bar chart provides a visual comparison of the top ten countries shown in the workbook. The Country Filter slicer supports interactive exploration. The detailed analysis table separates the overall title count into Movies and TV Shows for each listed country.

6.4 Result

The task provides a country-level view of title availability and makes it easier to compare the countries represented in the dataset. Country-specific totals and rankings should be read directly from the Pivot Tables and dashboard in the master workbook.

> **Evidence:** Refer to the Task_3_Country_Wise_Analysis screenshot folder and the Task 3 dashboard in the workbook.

7. Task 4 – Netflix Release Trend Visualization

7.1 Purpose

This task examined title counts by release year. The dashboard and Pivot Table organize Movies and TV Shows by year so that changes across release years can be viewed in a single trend visualization.

7.2 Dashboard Components

- Summary cards showing titles analyzed and selected release-year metrics.
- Line Chart titled “Netflix Titles by Release Year”.
- Growth Patterns section highlighting selected observations.
- Pivot Table with Release Year, Movie, TV Show and Grand Total fields.

7.3 Results Shown in the Dashboard

Measure	Value shown
Titles analyzed	8,790
Peak release year	2018
Titles in peak year	1,146
Titles released during 2015–2021	6,207
Share during 2015–2021	70.6%

7.4 Key Observation

The dashboard identifies 2018 as the peak release year, with 1,146 titles. It also shows that 6,207 titles, or 70.6% of the analyzed records, fall within the 2015–2021 period. The Line Chart provides the year-by-year view, while the Pivot Table provides the supporting counts by content type.

> **Evidence:** Refer to the Task_4_Release_Trend screenshot folder and the Task 4 dashboard and Pivot Table.

8. Overall Findings and Conclusion

8.1 Key Findings

- The cleaned working dataset contains 8,790 records.
- The content distribution is 6,126 Movies (69.7%) and 2,664 TV Shows (30.3%).
- The country-wise dashboard provides a Top 10 ranking view and an interactive Country Filter.
- The release-trend dashboard shows 2018 as the peak release year with 1,146 titles.
- The 2015–2021 period accounts for 6,207 titles, representing 70.6% of the analyzed records.

8.2 Conclusion

The project demonstrates the use of Microsoft Excel for preparing data, summarizing records with Pivot Tables, and communicating results through charts and dashboards. The four completed tasks provide different views of the Netflix titles dataset: data quality, content-type distribution, country-wise availability and release-year trends. The master workbook contains the underlying analysis, while the task-wise screenshots provide a visual record of the completed work.

8.3 Project Deliverables

Figure 14. Country-Wise Analysis – Movies and TV Shows

Appendix D – Task 4 Screenshots

The following screenshots provide visual evidence for Task 4: Netflix Release Trend Visualization. They show the overall dashboard, release-year Line Chart, growth-pattern observations, and the supporting Pivot Table.

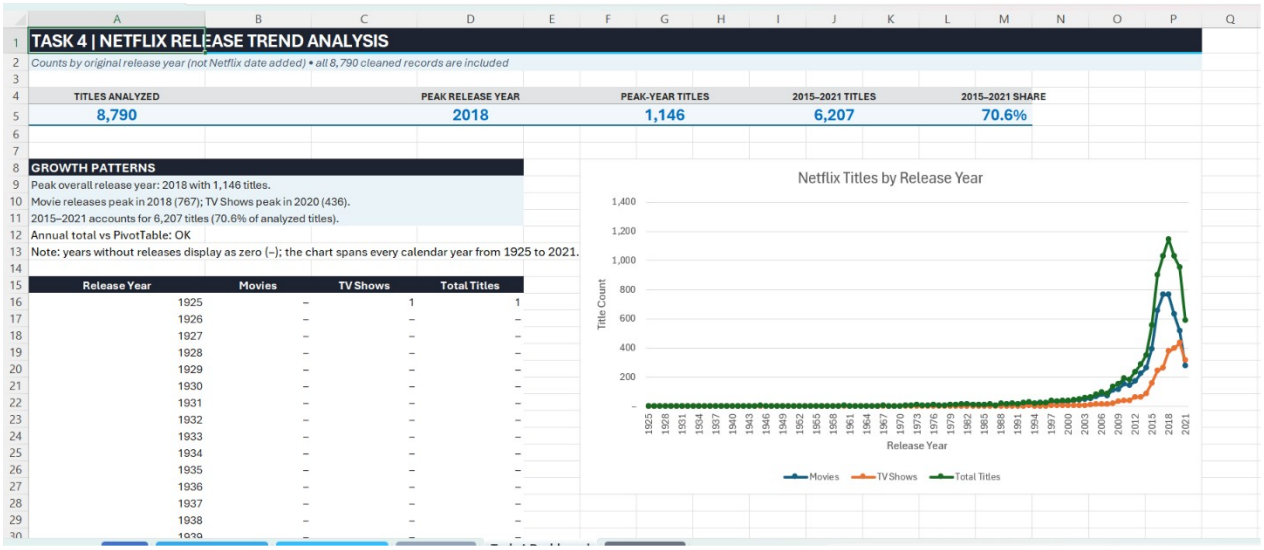

Figure 15. Task 4 – Netflix Release Trend Analysis Dashboard

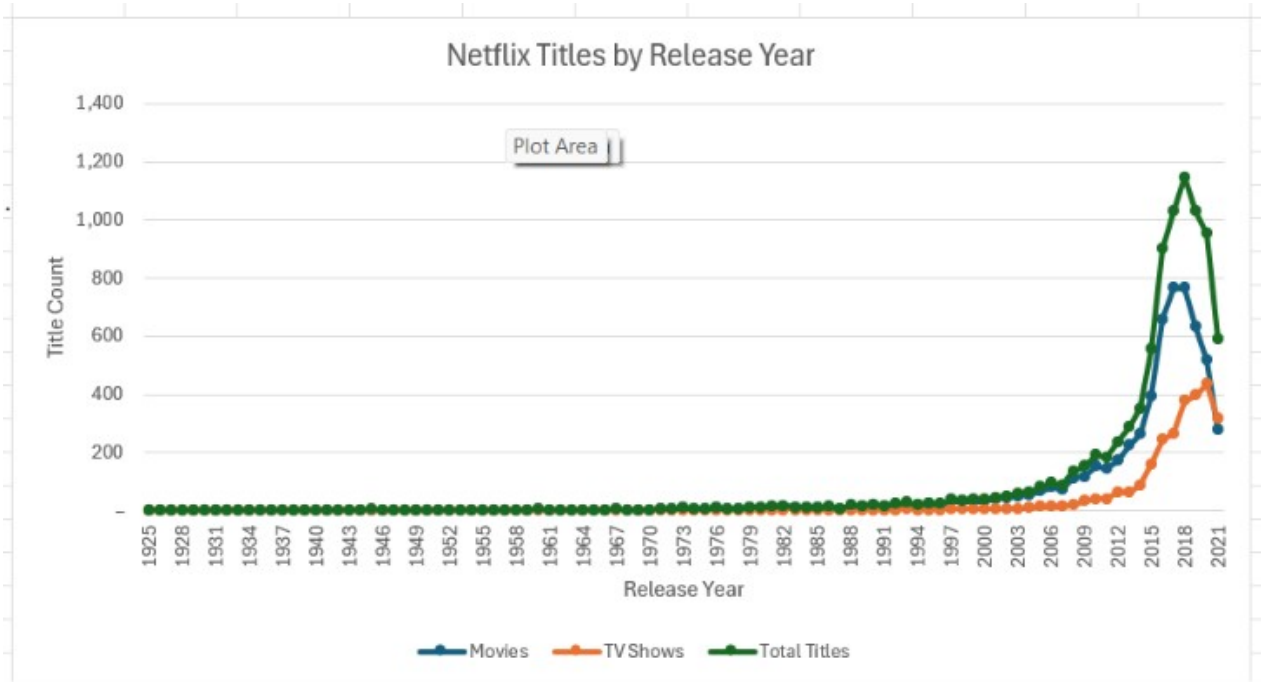

Figure 16. Line Chart – Netflix Titles by Release Year

GROWTH PATTERNS
Peak overall release year: 2018 with 1,146 titles.
Movie releases peak in 2018 (767); TV Shows peak in 2020 (436).
2015–2021 accounts for 6,207 titles (70.6% of analyzed titles).
Annual total vs PivotTable: OK
Note: years without releases display as zero (–); the chart spans every calendar year from 1925 to 2021.

Figure 17. Growth Patterns and Release-Year Observations

Title Count	Content Type		
Release Year	Movie	TV Show	Grand Total
1925		1	1
1942	2		2
1943	3		3
